

## Wireframe and Design annotations for TravelWise website

Below follow screenshots from high fidelity wireframes and annotations as designed in Adobe XD tool. All assets and colours were subsequently used in the development stage of the web application.

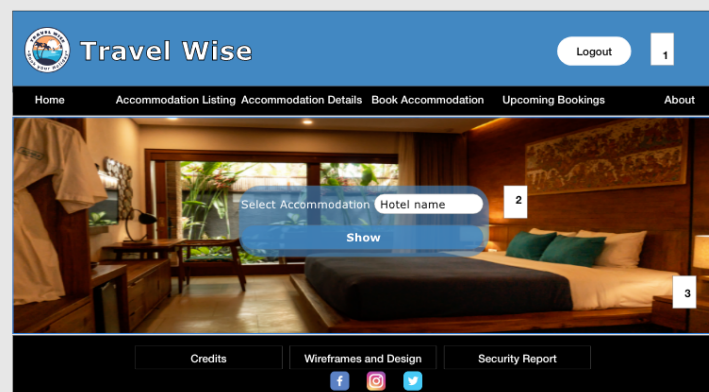

1. Accommodation Listing. All accommodations that are in the DB are displayed to the user. This page can be Accessed even if the user is not logged in

1. Generic image and message displayed to all users who Try access webpages that are access is restricted to Logged in users only. See next descriptions for pages Unavailable until successful login

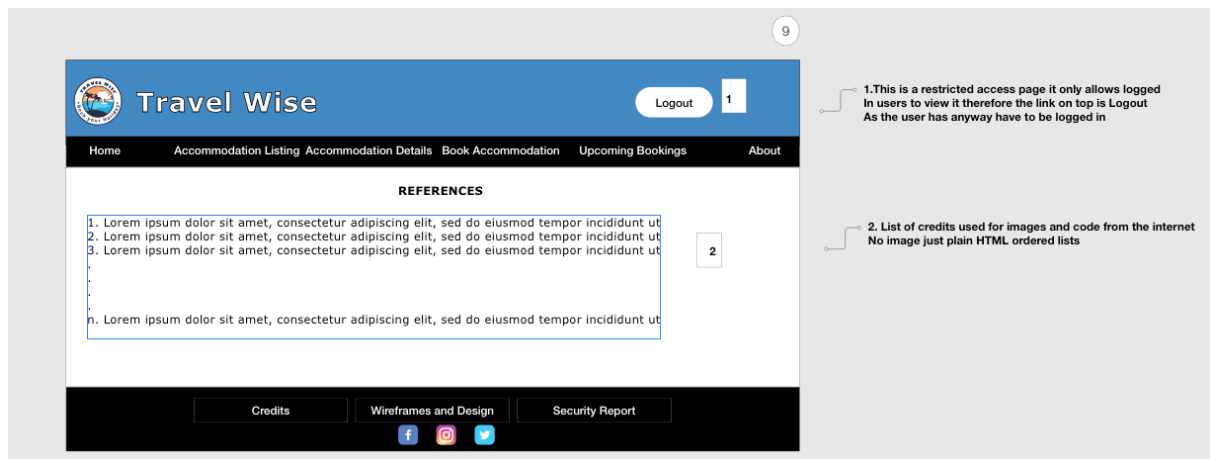

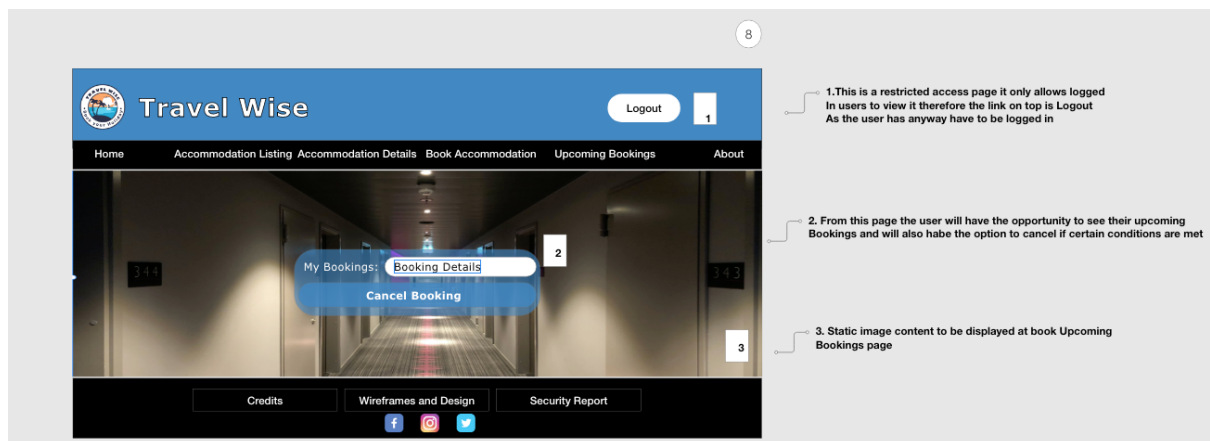

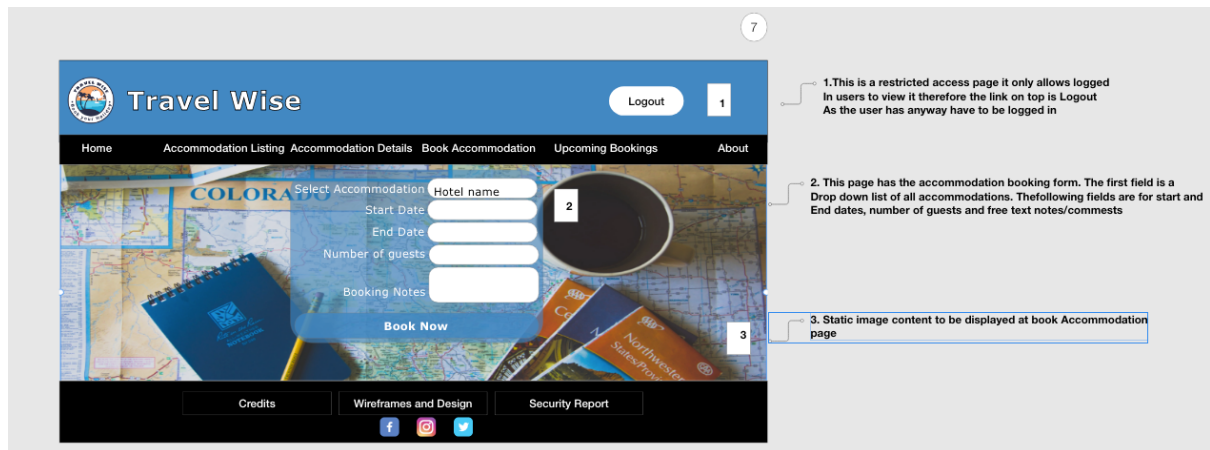

2. Static image content to be displayed at restricted pages

1. This is a restricted access page it only allows logged in users to view it therefore the link on top is Logout As the user has anyway have to be logged in

2. This page will allow the logged in user to select an accommodation From a dropdown list and when they click on Show button it will Display the basic information stored in DB about that accommodation. It will also have a link to directly book it

3. Static image content to be displayed at Accommodation Details page

1. This is a restricted access page it only allows logged in users to view it therefore the link on top is Logout As the user has anyway have to be logged in

2. This page will display a PDF with the security report
